

## From green to clean

- > Are you sick of your swimming pool being green instead of clean?
- > Are you tired of having to unblock and clean your salt chlorinator?
- > Had enough of trying to clean scale build-up off your swimming pool surfaces?

**DELTAwater solutions has the answer!**

Installing a DELTA swimming pool unit will:

- > Give your pool water a 'silky' feel
- > Prevent scale from restricting and blocking salt chlorinators
- > Prevent scale build-up on pool surfaces
- > Keep your pool balanced with less chemicals
- > Prevent algal growth in the pool water

Once your swimming pool surfaces, pipes and pumps are clean, they stay clean!

**Delta Diamond** is here! See overleaf for details

## Lime trees *thrive* after *magnetic touch*

Lime tree orchardist Phil Oliver's workload has grown since he installed one of our DELTA Magnetic Water Conditioners. But the northern Queenslander isn't complaining. His trees are flowering and fruiting more than ever, his yield is up and he's sure the result is down to our magnetic water technology.

He tells us that DELTA has transformed his harsh bore water into quality liquid and he's happy to shoulder the extra work from a more productive orchard. "I'm picking non-stop every two weeks now and I blame Alex and Dianne Panov from DELTAwater solutions," Phil jokes. "I'm behind on picking now because there's so much crop. They've given me much more work. And that's the problem. I have to work harder!"

Phil knew his 450-strong Tahitian lime tree orchard at Biboohra, north of Mareeba, was in trouble when lower branches sprayed with irrigated water from sprinklers started dying and yields slowed.

"Alex and Dianne told me about their magnet system and my wife and I thought 'how can a magnet fix your water?'" Phil says. "Yes, I was sceptical and they called me Sceptic Phil."

The orchardist installed a grade-four unit late last year and within three weeks saw a surge of life through his struggling trees.

*Phil Oliver's lime trees before treatment with a DELTA Magnetic Water Conditioner.*

*Accepting Phil, formerly Sceptic Phil, with one of his flourishing lime trees after treatment from a DELTA Magnetic Water Conditioner.*

***"I started seeing results with new shoots coming through the branches that were still alive around the base," he says. "And then within four weeks of watering, massive flowering started and it just hasn't stopped."***

**So Sceptic Phil has changed to Accepting Phil and his orchard is thriving.**

## Want to own a diamond?

But not just any diamond.

Get a diamond that sparkles and shines...a **Delta Diamond**

Our revolutionary Australian product will be your new best friend by keeping your household appliances in mint condition and your shower recess sparkling clean. Plus, your garden will be more lush than ever!

DELTA DIAMOND is a magnetic water conditioner that DELTAWater solutions has designed specifically to combat the effects of harsh town water on your home and garden.

*We offer attractive payment plans and we guarantee our 100% Australian designed and manufactured products.*

## DELTA launches 'diamond' product

Our 100% Australian company, which has been helping people across Australia solve water problems for the past 20 years, has launched a revolutionary new household product.

The DELTA Diamond is designed to combat the effects of scale build-up from town water on household appliances and in gardens. We have tested and trialled the product in NSW towns with some of the harshest town supplies in Australia.

Ian Perkins from Dubbo in far western NSW has been using a DELTA Diamond in his home for most of the year. "We are very happy with the performance our DELTA Diamond... starting from a very soft-feeling water that lathers up a lot easier, to dishes that come out of the dishwasher so much cleaner with no smears or residue left on them," Ian says. "The water is a lot more palatable and we enjoy drinking it a lot more."

***"Thank you for this product!  
I think every household  
would benefit from a  
DELTA Diamond."***

Helen Delphine from Quandiallia in NSW has also been testing the DELTA Diamond all year.

"I cleaned the hot water urn of any scale before I installed my DELTA Diamond, and have had no further build-up since. It's the same with the kettle," she said. "Also, my husband is no longer complaining about itchy skin after his shower. Now I know it is possible to have better water thanks to a DELTA Diamond."
