

mining - the benefits of DELTA technology

**100%
Australian
PRODUCT**

We wanted to share with you some of the great results our mining clients are experiencing thanks to the DELTA technology

Leighton Contractors

St Ives Mine Site, Kambala, WA

From Peter McMahon
Dewatering Supervisor | Leighton Mining

These are some of the pictures of the problems with salt and gypsum in some of our older pits. Most of these shots show the pipes after just 24 hours of pumping.

BEFORE

These photos were taken before we used the DELTAwater Magnetic Conditioning Technology at the site. As you can see by the early photos our job was very difficult pulling pumps apart and constantly breaking drive shafts.

AFTER

These photos show the set up and the inside of the pipes when we pulled it down for maintenance after installing the DELTA technology. The last photos of the inside of the pipes show a huge improvement.
